## TWIN SPIN WIRE FORMS

Twin Spins are a very good, snag resistant spinner bait, but they are difficult to find because they are more expensive for a lure manufacturer to make.

These Twin Spin Forms allow you to produce either a lure with the wire molded into the head, or a snap on Twin Spin that can be used to make a twin spin with any jig. (The Heads molded from the DO-IT Bullet Bass Jig mold work extremely well with the Snap On Form.)

## TANDEM SPINNER JIG FORM

This is a Jig Spinner form designed for use with 1/4-3/8 oz. jigs. Wire diameter is .032. The blade leg has been left open so you can make tandem spins as well as single spins.

The Jig Spinner forms work particularly well with a jig/plastic shad body. The plastic shad bodies have a tendency to go off to a side if they are not put on the hook straight. These bodies work better on a Jig Spinner form than on a fixed head Spinner bait.

Stock No.	Blade Leg Length	Jig Leg Length	100	500
430129	2.5"	2.0"	10.22	45.96

## JIG-SPINNER WIRE FORMS

Attach a jig and blade, and you have one of the most popular small spinner baits ever produced. Wire diameter is .028.
