

WIRE FORMS

TWIN SPIN WIRE FORMS

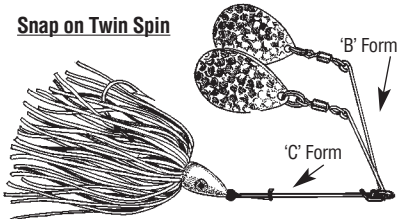

Twin Spins are a very good, snag resistant spinner bait, but they are difficult to find because they are more expensive for a lure manufacturer to make.

These Twin Spin Forms allow you to produce either a lure with the wire molded into the head, or a snap on Twin Spin that can be used to make a twin spin with any jig. (The Heads molded from the DO-IT Bullet Bass Jig mold work extremely well with the Snap On Form.)

Molded Twin Spin

Snap on Twin Spin

COIL WIRE FORMS

COIL FORM FOR DO-IT MOLDS

Stainless Steel Coil Form specially made to fit DO-IT Molds that use a Coil Wire Insert.

Stock No.	Coil Dia.	100	1000
472017	.16	6.95	61.95

SNAP ON COIL FORM

Stainless Steel Snap-on Coil for attaching trailers to Jigs, Spinner Baits or Hooks and attaching Soft Plastics and Swim Baits to hooks. Wire dia. on all coils is .020. Medium and large coils can be used on most hooks up to size 5/0. X-Lg. Coil has a large snap eye and can be used on 6/0-9/0 hooks with hook wire dia. up to approx. 0.75.

Stock No.	Length In.	Coil Dia.	Eye Dia.	25	100	1000

430217	0.68	0.16	0.080	3.29	8.89	81.67

LOK-ON COIL KEEPER

The Lok-On Coil Wire Form provides a more secure attachment to the hook than a snap on type. It is attached by screwing the coil onto the eye of the hook an then snapping the eye of the hook through the split ring type eye of the coil. This works best on regular jig hooks, but can be used on flay eye hooks as well. Mustad 91768BLN is a very good hook for use with this coil. Coil wire dia. is .021" can be used with hooks up to size 5/0.

TANDEM SPINNER JIG FORM

This is a Jig Spinner form designed for use with 1/4-3/8 oz. jigs. Wire diameter is .032. The blade leg has been left open so you can make tandem spins as well as single spins.

The Jig Spinner forms work particularly well with a jig/plastic shad body. The plastic shad bodies have a tendency to go off to a side if they are not put on the hook straight. These bodies work better on a Jig Spinner form than on a fixed head Spinner bait.

Stock No.	Blade Leg Length	Jig Leg Length	100	500
430129	2.5"	2.0"	10.22	45.96

JIG-SPINNER WIRE FORMS

Attach a jig and blade, and you have one of the most popular small spinner baits ever produced. Wire diameter is .028.

PLASTIC TUBING

For Dressing Treble Hook Shanks

Please specify color on order.

Plastic Tubing . . . Stock No. 402065 2.39/5' piece

STAINLESS STEEL COIL SPRING FASTENER

Coil Spring Fastener for use with open end wire forms. Made from .012 stainless wire. 1/2" long, .064 I.D. Use with .031 or smaller wire.

Stock No.	25	100
430180	2.52	7.43

HOLLOW BRASS LURE BODIES

These 3 bodies are specially designed to use with open eye wire shafts or snap lock shafts. The countersunk hollow in the body will slip down over closure on the form making the lure more weedless and strengthening the closure.

These bodies can be used on any of the open eye shafts. If you are using a snap lock shaft the 3/64 body will only fit the .035 snap shaft, the 1/8 body will fit the .035 or the .040 shaft and the 3/16 body will fit all of the snap lock shafts.

Available in (01) Brass or (03) Nickel finish. Specify finish on order.

Stock No.	Length	Width	Hole Dia	Wt. oz.	10	100
401284	.60	.25	.060	3/64	4.98	39.86
401285	.87	.32	.060	1/8	7.79	62.40
401286	.97	.38	.060	3/16	10.39	83.12

FINISHED LURE

You can make a variety of lures with these bodies. The coil spring fastener can be used on the .026 and .031 open eye shafts. The .035, .040 and .051 open eye wire shafts use the Sleeve Fastener for closure. A metal bead can be used if needed as a spacer on the wire shaft inside the body to keep the body from covering the eye of the shaft.
