

PLASTIC WORM SUPPLIES

BARLOW'S TACKLE SHOP offers a complete line of products for making plastic lures.

- **PLASTIC LIQUID**
- **SOFTENER**
- **HARDENER**
- **COLORS**
TRANSPARENT
FLUORESCENT
- **MOLDS**
SINGLE AND
MULTIPLE CAVITY

These products are made from the finest materials available. Virtually any type of plastic lure may be made, with the user having complete flexibility for adjusting the properties of the material to his own satisfaction. Check these advantages of making your own lures:

ECONOMICAL

Low initial cost, plus plastic may be re-melted and used repeatedly.

VERSATILE

Texture of plastic may be readily adjusted. Any variety of color or color combinations may be produced.

SIMPLE

No molds to heat to cure plastic. Just melt plastic and pour.

PROVEN PERFORMANCE

Plastic Liquid has been used successfully by thousands of fishermen. This is the same type of plastic used by the largest manufacturer of plastic lures.

PLASTIC LIQUID

Plastic Liquid is the primary material used to make soft plastic lures. It is available in 2 formulations. "Super Soft" used primarily for making soft plastic lures, and "Saltwater Formula" which is a firmer texture plastic for use where you want a plastic lure with a firmer texture. The material as supplied is a thin, milky liquid. This liquid changes to a soft, clear, plastic when heated (there are no catalysts to add, just heat). Plastic Liquid is specially formulated to give you a material which will float in water. The properties of the plastic may be changed by mixing in various additives. These are softener, hardener, etc.

A wide variety of colors or color combinations may be achieved since the plastic is clear and the user adds the color to the desired shade. All of the items offered for use with the plastic have been specially formulated for this use and are compatible with the plastic. This product line will enable you to produce virtually any plastic lure you may desire.

SUPER SOFT FORMULA

Stock No.	
405010	Pint.....12.95
405011	Quart 22.95
405012	Gallon65.95

SALTWATER FORMULA

Stock No.	
405005	Pint.....12.95
405006	Quart 22.95
405007	Gallon65.95

Please Note: Plastic liquid shipped to Alaska or Hawaii must be sent UPS and shipping charges are approximately \$35.00/gallon.

LIQUID COLOR

Add liquid color to clear plastic to produce shade of worm desired. Our colors are specially formulated for worm plastic.

Stock No.	
405022	1 oz. Bottle3.99

Note: 1 oz. of color is enough for 1/2 gallon of plastic.

RUBBER MOLDS FOR PLASTIC LURES

These molds are made from a high quality synthetic rubber compound. Under normal use the molds will last indefinitely. Our molds produce a lure with good detail and a very shiny finish. Molds are available in single cavity and multiple cavity as indicated on the illustrated mold sheets.

LURE GLITTER

Lure Glitter
Mostly used as an additive to plastics when molding glitter worms. It also can be added to clear paint or epoxy and effectively applied to lure bodies, spinner bait heads, blades & etc. 2 Fl. Oz. bottle.
